

SETH to carry out electricity supply in Mozambique

SETH has entered into a contract for the execution of the electricity supply in Mozambique in south-eastern Africa.

The contract is a turnkey contract and consists of the establishment of 140 kilometres of 275 kV high-tension transmission lines and 100 kilometres of 110 kV high-tension transmission lines as well as four transformer stations north and north-east of the capital Maputo.

The contract has a value of approx. € 70 million and is financed by DANIDA Business Finance. The project is to ensure a stable electricity supply to citizens and businesses and is essential for growth in the country. The contract may be extended up to the amount of € 112 million with further option packages that the client may activate during the execution of the contract.

The client of the project is Electricidade de Moçambique which is the state-owned electricity supply company. SETH carries out the contract in joint venture with the Danish contracting company AARSLEFF. ABB AB supplies the equipment for the transformer stations.

The project will be carried out over a period of 30 months.
